

# Aayush Arora

**Founder, Suraksha**

Founder and solo builder of Sakshi, an AI personal safety platform that detects threatening behaviour patterns from camera and mic sensors and escalates to SOS only after verification. Unity and C# developer with 14 months of professional experience at Sunbase, where I built a QA automation framework, an OpenCV document scanner and an AR measurement tool.

**Contact Number: +91 6290333489**

**Email:** surakshaforbusiness@gmail.com

**Work Location:** Bengaluru, Karnataka

**Linkedin:** https://www.linkedin.com/in/aayush-arora-1aa551329/

**GitHub:** https://github.com/CoffeeBoi347

## EDUCATION

**Bachelor's program in AI & Business**
Scaler School Of Technology
*08/2026 - 2030 (Expected)*

**B.Sc. (Hons.) Computer Science (online)**
BITS Pilani
*08/2026 - 2030 (Expected)*

**Unity Developer Trainee**
Red Apple Learning
*04/2024 - 05/2025*

## SKILLS

- **AI & Computer Vision:** OpenCV, YOLO, MediaPipe, pose estimation, real-time computer vision
- **Backend:** Python, FastAPI, WebSockets, REST APIs, Supabase, authentication
- **Unity and Games:** Unity, C#, Photon PUN2, real-time multiplayer, AR
- **Cloud and Tools:** AWS, Docker, Git, GitHub, CI/CD
- **Testing:** automated testing, QA automation frameworks

.

## PROFESSIONAL EXPERIENCE

**Founder & Lead Developer |** Suraksha

*August 2026 – Present*

**SAKSHI AI-Assisted Personal Safety Platform**

- Solo-built Sakshi, an AI safety platform that detects threatening behaviour patterns (following, closing in, contact) from camera and mic sensors and escalates to SOS only after verification, with a user cancel.
- Built the full pipeline end to end: pose detection and tracking (YOLO, ByteTrack), threat scoring, Gemini verification, SOS flow, authentication and incident logging.
- Demo Link: https://youtu.be/Jk46ixaHbuQ (Early Stages)

**Unity Developer |** *Sunbase* (Remote, US-Based)

*June 2025 – August 2026*

- Transitioned rapidly from Intern to full-time Unity Developer based on production performance.
- Engineered a custom **QA automation framework** covering over 150+ test cases featuring a specialized CLI runner.
- Developed and optimized an **OpenCV-based document scanning pipeline** integrated directly into core company workflows.
- Developed and integrated an end-to-end AR measurement tool, implementing interactive UI controls and real-time spatial mapping for precise surface distance estimation.
